

London Handicap Scale (LHS)

Mobility	Value	Patient
1 No disadvantage	0,071	<input type="checkbox"/>
2 Minimal disadvantage	0,038	<input type="checkbox"/>
3 Mild disadvantage	0	<input type="checkbox"/>
4 Moderate disadvantage	-0,036	<input type="checkbox"/>
5 Severe disadvantage	-0,072	<input type="checkbox"/>
6 Most severe disadvantage	-0,108	<input type="checkbox"/>
Score		

Physical independence	Value	Patient
1 No disadvantage	0,102	<input type="checkbox"/>
2 Minimal disadvantage	0,011	<input type="checkbox"/>
3 Mild disadvantage	-0,021	<input type="checkbox"/>
4 Moderate disadvantage	-0,053	<input type="checkbox"/>
5 Severe disadvantage	-0,057	<input type="checkbox"/>
6 Most severe disadvantage	-0,061	<input type="checkbox"/>
Score		

Occupation	Value	Patient
1 No disadvantage	0,099	<input type="checkbox"/>
2 Minimal disadvantage	-0,004	<input type="checkbox"/>
3 Mild disadvantage	-0,014	<input type="checkbox"/>
4 Moderate disadvantage	-0,024	<input type="checkbox"/>
5 Severe disadvantage	-0,035	<input type="checkbox"/>
6 Most severe disadvantage	-0,061	<input type="checkbox"/>
Score		

Social integration	Value	Patient
1 No disadvantage	0,063	<input type="checkbox"/>
2 Minimal disadvantage	0,035	<input type="checkbox"/>
3 Mild disadvantage	0,007	<input type="checkbox"/>
4 Moderate disadvantage	-0,022	<input type="checkbox"/>
5 Severe disadvantage	-0,029	<input type="checkbox"/>
6 Most severe disadvantage	-0,041	<input type="checkbox"/>
Score		

Orientation		
1 No disadvantage	0,109	<input type="checkbox"/>
2 Minimal disadvantage	-0,008	<input type="checkbox"/>
3 Mild disadvantage	-0,038	<input type="checkbox"/>
4 Moderate disadvantage	-0,051	<input type="checkbox"/>
5 Severe disadvantage	-0,063	<input type="checkbox"/>
6 Most severe disadvantage	-0,075	<input type="checkbox"/>
Score		

Economic self sufficiency		
1 No disadvantage	0,1	<input type="checkbox"/>
2 Minimal disadvantage	0,067	<input type="checkbox"/>
3 Mild disadvantage	0,033	<input type="checkbox"/>
4 Moderate disadvantage	-0,023	<input type="checkbox"/>
5 Severe disadvantage	-0,067	<input type="checkbox"/>
6 Most severe disadvantage	-0,111	<input type="checkbox"/>
Score		

London handicap scale = SUM (all 6 utility values) + 0.456

where:

- The sum of all "no disadvantage" values is 0.544 which when added to 0.456 gives 1.00.
- The sum of all "most severe disadvantage" values is -0.456 which when added to 0.456 gives 0.00.

Interpretation:

- minimum scale value: 0
- maximum scale value: 1.00
- The scale value corresponds to residual function with 1.00 indicating normal function and 0.00 indicating total disability.

Performance:

- Pearson's correlation coefficient between predicted and measured values: 0.98
- Kendall's coefficient of concordance (tau): 1.00
