

Power Play Kids

2024 Pediatric CIMT Summer Camp

Led by our specialty-trained occupational therapists, Power Play is a multi-week program that focuses on improving upper extremity function in children who have spastic hemiplegia or hemiparesis as a result of cerebral palsy, traumatic brain injury, brachial plexus injury, stroke or other diagnosis.

This program utilizes principles from a modified Constraint-Induced Movement Therapy (CIMT) protocol, in which the unaffected arm is restrained by a removable cast and the affected arm is used for all functional activities.

Camp activities include games, art projects, outings, sensory play activities, bimanual activities, and self-care. Children will be evaluated at the beginning and end of camp to measure progress and use of the affected arm.

A physician referral/prescription is required to participate in the camp. Participants must have an insurance policy that will cover group therapy.

July 22–August 8

Monday–Thursday

Ages 3–6

8:30–11:30am

355 East Erie St., 18th Floor

Participants must be:

- Ambulatory
- Able to grasp and release an object with the affected arm
- Potty-trained
